### CMS Platforms

Drupal, Sitecore, Wordpress

### Project Management

Agile Methodologies, Jira, Confluence, Toggl, Asana, Harvest

### Accessibility

WCAG Standards, a11y Best Practices

## Experience

### Modea

UX/UI Designer II | 08/2023-09/2024 (Remote)

- Consulting with stakeholders for Large Academic Medical Centers to understand business and user needs while adhering to Standards of Work
- Collaborating with a cross-functional team in a two-week sprint cycle to ensure designs and implementation are on track through effective communication
- Creating technically specific responsive compositions for clients needing forward thinking designs with functionality and current WCAG standards in mind.
- Use of technology such as Confluence for documentation, Jira for task management, Figma for design and dev, and Toggl for timekeeping
- Cross training with a software engineer to improve in CMS development for Drupal, Sitecore, and Wordpress.

### Matchbox Design Group

Intern | 05/2023-07/2023 (Remote)

- Collaborated with the team in a two-week sprint cycle and actively participating in daily standup meetings to keep everyone aligned and informed.
- Designed comprehensive style guides for upcoming websites, facilitating smooth design implementation by effectively transferring design elements to the development phase.
- Engaged in brainstorming sessions to explore innovative ways of enhancing websites through engaging animations, impactful color schemes, and effective visual hierarchy.
- Employed tools such as Figma, Asana, VSCode, Harvest for time tracking, and Confluence to streamline project management, design collaboration, and documentation.
- Resolved support issues on clients' websites by carefully examining and troubleshooting code to identify and rectify errors.
- Ensured the websites are up-to-date and fully functional while applying knowledge in JavaScript, HTML, CSS, and PHP to address technical requirements.

### Transform Health and Wellness

Founder/UX/UI/Full-stack developer | 09/2022-Present (Remote)

- A passion project driven by the desire to make resources accessible in one place for the trans community.
- Data driven by feedback during interviews and usability tests.
- Ideated on paper then designed in Figma
- Developed a Single Page Application in VSCode utilizing HTML, CSS, and Javascript and custom REST API's communicating with MongoDB.
